# Truepress *ink* SC

for Truepress Jet520HD

## New wide-gamut inks for direct printing on offset coated paper!

SC inks continue to provide the same wide color gamut and stability as Truepress inks while also featuring our unique absorption technology. This advance eliminates the preprocessing usually required for the surface of offset coated papers.\* Being able to print directly on to the paper preserves its texture, enabling you to produce outstanding results.

SC inks maximize the exceptional quality already available with the Truepress Jet520HD and open up a wide range of new possibilities for inkjet printing. Take advantage of this winning combination to help grow your business.

\* Please contact our sales office regarding tested papers. Pretesting is also recommended.

### ◆ Greater expression using paper textures

SC inks maintain the integral texture and feel of coated paper. This significantly expands potential print applications to include direct mail, books, catalogues and a wide range of other commercial uses.

### ◆ Photographic quality approaching offset printing

These new inks also feature properties that include superior water, heat and light resistance, as well as a wide color gamut that closely approaches offset types. Unprecedented quality is now within your grasp for inkjet printing.

### ◆ Low cost solution with faster turnaround

Surface processing is no longer required for coated papers. Elimination of this step helps to minimize processing times and costs, making SC inks a highly economical solution for your printing needs.

### ◆ Printing on a wide variety of paper types

Printing is also possible on a wide range of non-coated papers, including standard and specialized inkjet types. Thanks to this versatility, you can now use various different paper types on the same press.
